

Any company that wants to own all boardcasting stations are imperialistic in nature, and I dont feel their news COULD be unbiased. This is not fair to a public that depends so much on television as their only souce of information, consider people who cannot see to read a news-paper, or the deaf who cannot hear a radio, its not fair to the public, who has supported the FCC for its history. Is also not fair to me, who will have to question the validity of any information I receive , every time I watch the news.

Capilism is running rampant, this is an example of money controlling our society. If the monoply laws are dropped, we may see the beginning of George Orwell's,1984.
